HEAL THE WEB A & B IS A STRONGLY GEOMETRIC FONT FAMILY WITH MANY ALTERNATE GLYPHS.

IT IS OPEN SOURCE! LICENSED UNDER THE MPL-2.0 LICENSE.
As result we developed two corresponding, combinable fonts: Heal the Web A, with improved legibility for Body text and Heal the web B for big Screensizes and experimental edgy typography.

Both Versions have collections of alternate Glyphs which originated from In-between steps of the design process. They are accessible through OpenTypes Stylistic sets.

The original lettering resembled circuits, connections and networks through geometric shapes sticking together like an abstract puzzle. This complex lettering became the source for a new font.

While preserving the original edgy character of the Glyphs our goal became to create an entire font with improved legibility and the potential for typographic experiments.

It started with a message; "Heal the Web!" - developed by Rainbow Unicorn for Mozilla's yearly Internet Health Report.
